Student should fill the Concluded/Correct percentage

Minimum functionality enough to pass		Concluded/Correct (100 %)
Implementation of a clipboard that accepts multiple simultaneous local connections: clipboard_connect, clipboard_copy, clipboard_paste	Todes as funcións.	oudiétés implementates or como esporato.
Synchronization	+1 value	Concluded/Correct (100 %)
Definition of the various critical regions and implementation of correct synchronization	negices critices correctente i-plenetedes, impedindo conflites ao ler lescrever écés.	
Efficient synchronization	+1 value	Concluded/Correct (100%)
Implementation of synchronization on the critical regions guaranteeing that they are the shortest possible	Sincronigaçoi implementate correctemente e com regiões criticos o mais relugitos possível (ex. aponos en volta de escrita en mero deixente os writes de tora.)	
Clipboard_wait	+1 value	Concluded/Correct (100 %)
Correct implementation of the clipboard_wait function	Weit a tuncion	nor correctmente. Sempre non do, o cliente tica bloques ma madaça na regiãos e a
Connection to another clipboard	+1 value	Concluded/Correct (100 %)
Implementation of the -c option, basic replication of the data among the various clipboards Detection of disconnect e correct execution aftwards	Conexão tomical e testeda e- PC's diterentes. Detecta descouexões e continum os restentes aliphoards a tomerener apris 1 se tesconedor +1 value Concluded/Correct (100 %)	
Correct replication among clipboards	+1 value	Concluded/Correct (100 %)
Implementation of a correct synchronization algorithm that guarantees the consistency of the data when two simultaneous copies occur in different clipboards	Quado de cópico a mensage- posteriermente o de	e cima propaga pera "baixo" stância los dados.
Errors treatment	+1 value	Concluded/Correct (@ %)
Verification, correction and report of communication errors Verification, correction and report of execution errors on the clipboards	Verificação sempre a nivel de binds, verificação se algudos tos verificação bem sucedidos.	que un clipbeard se liga listens, accept etc. 1. MAR m clipboard sá à existe atraver se os news e writes form
Correct Resources management	+1 value	Concluded/Correct (50 %)
Correct management (destruction) of threads, sockets, memory	Prees, closes de tos e exits de therado feitos se-pre que possive! Un entento ao usor o valgrind après un ctrl-a tian se-pre algues trees por toger	
Code structure	+1 value	Concluded/Correct (100 %)
Report	+1 value	Concluded/Correct (100 %)
Discussion	+1 value	Concluded/Correct (%)
Incorrect implementation of the API	-10 values	Concluded/Correct (_ 0_ %)
